

Faucet Displays- RPP Ordering Process & FAQs

Ordering Steps- www.replacementpartspros.com:

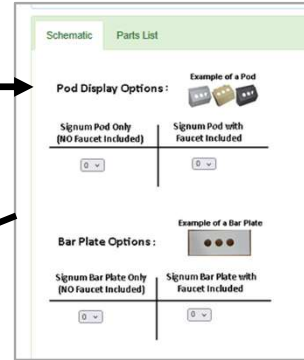

1. Enter the SKU, model #, or key word into the search field.

2. From the output, select the pod tile for ordering displays.

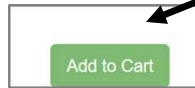

3. Select the drop-down box for the needed display. Select **ONE** option.

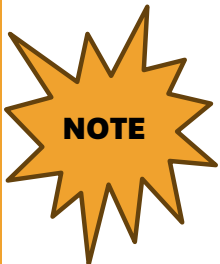

Options include the empty plastic pod, the empty BAR PLATE, the plastic pod with mounted faucet OR the BAR PLATE with mounted faucet.

4. Click "Add to Cart" and proceed to the checkout process.

Bath Accessory and Collection Boards are also available and searchable by collection name.

For stores set with BAR displays, an additional fixture must be ordered through Ariba to secure the plate on the wall. This is the white/black metal piece, and it is not orderable on RPP.

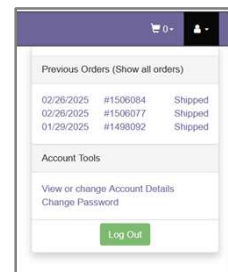

Ariba item info:

Colony Part#	Description	PRICE / ea
H05-0493-002-P000-2PK	Channel 2pk Kit	\$15.00

Additional Faucet Display Information/Best Practices:

- Stores are not charged for faucet display orders.
- Signum, the display manufacturer, double checks all orders to ensure the correct pod type (BAR or Plastic) is selected. If ordering plastic displays, the proper color for the store location will be used.
- If just a part is missing from a faucet, first try to order the part. Lead times for parts are much shorter, and this will reduce the expense for the manufacturer.
- Pod Displays are built as they are ordered and have a **longer lead time** than most RPP items. The status of an order can be viewed under My Account or on the Store Order History Report (on the home page of RPP). **Do not place a duplicate order, as it will be cancelled.**
